NOT TOUCH

It's time to grow

It is been said that education is the key to a better life. Take a moment to think about it in your own life. Take a look at the people around you. See how they are at this specific moment. Are they in good health? Are they strong? Are they in peace? Are they doing what they enjoy? Are they the best expression of what they can be? are they happy?... are you happy?

It is hard to think about this topics at this moment. Most of all because the world at large is not giving us the chance to analyze the true situation of our life. Instead of that, we are just reacting to survive in our immediate reality. We work hard everyday to meet our most essential needs. Food, clothing, paying bills. We struggle to complete the day in good shape and take the good sleep we deserve. We think about the future and sometimes we don't like what we see.

Today, only 10% of the adults of the world owns 86% of global wealth. While the lower half of the population –a little more than 3 billion people– accounts for only 1% of the global wealth. And the inequality has spread all over the world. For example, in the US, a CEO from a food chain earns 10,000 times a regular worker from the same company.

What are the consequences? That wealth is concentrated in the hands of 1% of the population and the resources don't go where they should. For example, some 1.1 billion people in developing countries have inadequate access to water, and 2.6 billion lack basic sanitation.

Are you still there? This is the reason why it is not comfortable to take a moment to think. And you could

say in good reason that your life is different, that you have earned enough to have a good life and provide to your family. Ok, this is true, but for how long?

Income for many families is in a downward spiral for quite some time. The 99% has seen their income decline from 91% in 1976 to 79% in 2010. The share of wealth owned by the bottom 90 percent declined from 19.1% in 1962 to 12.8% in 2009. And it is still counting.

Education in need to evolve

So, if this is happening right now, you may ask yourself how education has helped you. You have done all your previous studies with good effort, and for what? Should you drop your education and live your life without thinking in this problems anymore? Yes, you can do that. But know for sure that everything will get worse day by day. If you decide to drop your studies you will be contributing to this social breach around the world. So, think again.

According to the United Nations, there is evidence that social factors, including education, employment status, income level, gender and ethnicity, have a marked influence on how healthy a person is. In all countries –whether low, middle, or high-income– there are wide disparities in the health status of different social groups. The lower an individual's socio-economic position, the higher their risk of poor health.

To overcome inequality you need to be the greatest version of yourself. You need to be in good health, you have to be aware of the world and its opportunities, you need to know how to use the knowledge you have

learnt during all of your life. You need to expand your horizons. You need to dare to be different. To be whole.

I know that this could be easy to say, but you must be wondering, how do I become the best version of myself if I am already working, I have a good family and I am studying an international degree? Isn't it suppose to be enough?

The key to a comprehensive education.

At AIU we have been always working to offer the greatest academic education in the most affordable platform available. And even though we are really proud of it, we didn't stay in our comfortable zone. We are always considering what we can do to offer a comprehensive education. Something that will enable you and any other person to become the greatest version of yourself.

Traditional education focus only on academic programs. We cover it, but we go way beyond that. This means that along with your academical program, you will have dynamic resources to expand your horizons and have a comprehensive education.

Being a comprehensive person you will have the resources to change the world, to offer solutions for a better living. And most of all, you can give yourself and your family the chance for a more balanced life in which you are what you truly decide to be.

Based in the ultimate comprehensive education, we present to you **MyAIU**: A place where you can learn, develop yourself, help others, and feel free to share your ideas and knowledge with the world.

MyAIU Live, learn & share

A place where you can feel free to express yourself and share your thoughts with the world, MyAIU allows you to upload material in different formats and share it to the world. Do you have a new book? Do you write music? You have speeches you are proud of? Any presentations you have made? Courses? What about those pictures you have taken and deserve to be seen all over the world by the AIU family?

MyAIU allows you to do all that and much more to expand your horizons and be more aware of the things happening around you. Get involved and start uploading your work to share your knowledge and

experience, and learn from others to become a more successful individual or professional.

MyAIU's mission is to motivate and allow AIU family to access different activities and information that will let us learn and apply it to our lives in so many different ways to keep a positive attitude and happiness in their lives.

The elements that integrate this Human

Development Center are MyAIU Body, MyAIU Mind, MyAIU Spirit, MyAIU Energy, MyAIU Evolution, MyAIU Money, MyAIU Knowledge, MyAIU Research, MyAIU Human Rights, MyAIU Pledge, MyAIU Language Center, and MyAIU Pedia, the tool that integrates all the elements. Every member can enrich MyAIU by uploading their own valuable publications in different formats, such as books, video, courses, articles, images, components and audio.

Holistic education

Holistic development refers to human development that is meant to involve all the parts of a person,

including physical, mental, emotional, social, intellectual, cultural, ethic and spiritual development.

Holistic education is a philosophy of education based on the premise that each person finds identity, meaning, and purpose in life through connections to the community, to the natural world, and to humanitarian values such as compassion and peace. Holistic education aims to call forth from people an intrinsic reverence for life and a passionate love of learning. This is the definition given by Ron Miller, founder of the journal *Holistic Education Review* (now entitled **Encounter: Education for Meaning and Social Justice**). The term holistic education is often used to refer to the more democratic and humanistic types of alternative education. Robin Ann Martin (2003) describes this further by stating, "At its most general level, what distinguishes holistic education from other forms of education are its goals, its attention to experiential learning, and the significance that it places on relationships and primary human values within the learning environment."

The concept of holism refers to the idea that all the properties of a given system in any field of study cannot be determined or explained by the sum of its component parts. Instead, the system as a whole determines how its parts behave. A holistic way of thinking tries to encompass and integrate multiple layers of meaning and experience rather than defining human possibilities narrowly.

MyAIU Body

Learn about how to keep yourself in the best possible shape in and out. Our mission is to integrate and motivate our community to change their lifestyle and improve their health, nutrition and all those different facts that will be reflecting in a better life.

MORPHOLOGY: The hilarious guessing game where creativity wins. The idea for Morphology first emerged during a snow-storm in Minneapolis, MN. Morphology inventor and recent Macalester College graduate Kate Ryan Reiling and two of her friends were stranded in their apartment and decided to play a board game.

FEATURES :: What comes in the game: 6 wooden blocks, 2 black circles, 9 glass beads, 12 cubes, 240 word cards, 4 wooden people, 1 string, 1 piece of green felt, 1 timer, 4 team frogs, 1 die, 1 board, 1 rules booklet.

How to play: Build. Each team selects a Morphologist™, the person who will create the first word. Without talking, the Morphologist™ must “morph” the pieces into the word. However a certain level of nodding, grunting and encouraging by the Morphologist™ is allowed. **Guess.** Each time a team correctly guesses the word in the 1 minute allowed, it moves its frog forward to the next lily pad. The die is always passed to the left. **Win.** The first team to reach the final lily pad wins!

COLLECTIVE CONCIIOUSNESS is all about sharing information and increasing the conscious awareness of people, on mother earth. When we become fully aware of who we really are and how powerful each individual person really is, we can start to take back the power, which is so rightfully ours. Our ultimate goal, is to help people to truly feel free of any emotional attachments, ego oriented decision making and to just be present in the moment with complete happiness and self worth.

FEATURES :: Education. Here are two talks given by Sir Ken Robinson at the TED conference. **Business Blog.** Posts in different categories, such as business, environment and awareness. **Feature movie.** The latest inspirational movie published.

ABOUT US

General Information

Atlantic International University offers distance learning degree programs for adult learners at the bachelors, masters, and doctoral level. With self paced program taken online, AIU lifts the obstacles that keep professional adults from completing their educational goals. Programs are available throughout a wide range of majors and areas of study. All of this with a philosophically holistic approach towards education fitting within the balance of your life and acknowledging the key role each individual can play in their community, country, and the world.

Accreditation

While National Accreditation is common for traditional U.S. institutions of higher learning utilizing standard teaching methods, every country has its own standards and accrediting organizations. Accreditation is a voluntary process and does not guarantee a worthy education. Rather, it means an institution has submitted its courses, programs, budget, and educational objectives for review. AIU's Distance Learning Programs are unique, non-traditional and not accredited by the U.S. Department of Education. This may be a determining factor for those individuals interested in pursuing certain disciplines requiring State licensing, (such as law, teaching, or medicine). It is recommended that you consider the importance of National Accreditation for your specific field or profession.

Although Atlantic International University's individualized Distance Learning Degree Programs, are distinct from traditional educational institutions, we are convinced of their value and acceptance worldwide. Non-traditional programs are important because they recognize knowledge gained outside the classroom and incorporate a broader more comprehensive view of the learning experience. Many great institutions are unaccredited. We invite you to compare our programs and philosophy with traditional classroom-based programs to determine which is best suited to your needs and budget.

AIU has chosen private accreditation through the Accrediting Commission International (ACI), obtained in 1999. ACI is not regulated or approved by the US Department of Education. ATLANTIC INTERNATIONAL UNIVERSITY IS NOT ACCREDITED BY AN ACCREDITING AGENCY RECOGNIZED BY THE UNITED STATES SECRETARY OF EDUCATION. Note: In the U.S., many licensing authorities require accredited degrees as the basis for eligibility for licensing. In some cases, accredited colleges may not accept for transfer courses and degrees completed at unaccredited colleges, and some employers may require an accredited degree as a basis for eligibility for employment.

AIU is incorporated in the state of Hawaii. As a University based in the U.S., AIU meets all state and federal laws of the United States. There is no distinction between the programs offered through AIU and those of traditional campus based programs with regards to the following: your degree, transcript and other graduation documents from AIU follow the same standard used by all U.S. colleges and universities. AIU graduation documents can include an apostille and authentication from the U.S. Department of State to facilitate their use internationally. Authentication from the U.S. Department of State is a process that will ultimately bind a letter signed by the U.S. Secretary of State (permanently with a metal ring) to your graduation documents.

The AIU Difference

It is acknowledged that the act of learning is endogenous, (from within), rather than exogenous. This fact is the underlying rationale for "Distance Learning", in all of the programs offered by AIU.

The combination of the underlying principles of student "self instruction", (with guidance), collaborative development of curriculum unique to each student, and flexibility of time and place of study, provides the ideal learning environment to satisfy individual needs. AIU is an institution of experiential learning and nontraditional education at a distance. There are no classrooms and attendance is not required.

Mission & Vision

MISSION: To be a higher learning institution concerned about generating cultural development alternatives likely to be sustained in order to lead to a more efficient administration of the world village and its environment; exerting human and community rights through diversity with the ultimate goal of the satisfaction and evolution of the world.

VISION: The empowerment of the individual towards the convergence of the world through a sustainable educational design based on andragogy and omniology.

Education on the 21st century

AIU Service

AIU is striving to regain the significance of the concept of education, which is rooted into the Latin “educare”, meaning “to pull out”, breaking loose from the paradigm of most 21st century universities with their focus on “digging and placing information” into students’ heads rather than teaching them to think.

For AIU, the generation of “clones” that some traditional universities are spreading throughout the real world is one of the most salient reasons for today’s ills. In fact, students trained at those educational institutions never feel a desire to “change the world” or the current status quo; instead, they adjust to the environment, believe everything is fine, and are proud of it all.

IN A WORLD where knowledge and mostly information expire just like milk, we must reinvent university as a whole in which each student, as the key player, is **UNIQUE** within an intertwined environment.

This century’s university must generate new knowledge bits although this may entail its separation from both the administrative bureaucracy and the faculty that evolve there as well.

AIU thinks that a university should be increasingly integrated into the “real world”, society, the economy, and the holistic human being. As such, it should concentrate on its ultimate goal, which is the student, and get him/her deeply immersed into a daily praxis of paradigm shifts, along with the Internet and research, all these being presently accessible only to a small minority of the world community.

AIU students must accomplish their self-learning mission while conceptualizing it as the core of daily life values through the type of experiences that lead

to a human being’s progress when information is converted into education.

The entire AIU family must think of the university as a setting that values diversity and talent in a way that trains mankind not only for the present but above all for a future that calls everyday for professionals who empower themselves in academic and professional areas highly in demand in our modern society.

We shall not forget that, at AIU, students are responsible for discovering their own talents and potential, which they must auto-develop in such a way that the whole finish product opens up as a flower that blossoms every year more openly.

THE AIU STANCE is against the idea of the campus as a getaway from day-to-day pressure since we believe reality is the best potential-enhancer ever; one truly learns through thinking, brainstorming ideas, which leads to new solutions, and ultimately the rebirth of a human being fully integrated in a sustainable world environment. Self-learning is actualized more from within than a top-down vantage point, that is to say, to influence instead of requesting, ideas more than power. We need to create a society where solidarity, culture, life, not political or economic rationalism and more than techno structures, are prioritized. In short, the characteristics of AIU students and alumni remain independence, creativity, self-confidence, and ability to take risk towards new endeavors. This is about people’s worth based not on what they know but on what they do with what they know.

AIU offers educational opportunities in the USA to adults from around the world so that they can use their own potential to manage their personal, global cultural development. The foundational axis of our philosophy lies upon self-actualized knowledge and information, with no room for obsolescence, which is embedded into a **DISTANCE LEARNING SYSTEM** based on **ANDRAGOGY** and **OMNIOLOGY**. The ultimate goal of this paradigm is to empower learners and help them take advantage of the enormous array of resources from the world environment in order to eliminate the current continuum of poverty and limitations.

This will become a crude reality with respect for, and practice of, human and community rights through experiences, investigations, practicum work, and/or examinations. Everything takes place in a setting that fosters diversity; with advisors and consultants with doctorate degrees and specializations in Human Development monitor learning processes, in addition to a worldwide web of colleagues and associations, so that they can reach the satisfaction and the progress of humanity with peace and harmony.
